SERVING UP
FASTER CONVERTING

RAFLACOAT PLUS

Raflacoat Plus is even more rigid and stronger than before, reducing downtime and speeding up production processes. With Raflacoat Plus, faster converting is now being served.

UPM RAFLATAC

RAFLACOAT PLUS – FOR ADDED CONVERTING SPEED AND CONTRAST

...HAS JUST GOT EVEN BETTER.

At UPM Raflatac, doing more for our customers comes naturally. That's why we've taken our market leading midgloss paper, Raflacoat, and made it even better. The result of this continuous product improvement is Raflacoat Plus. The extra qualities of our new machine-coated 80g midgloss paper with medium stiffness make it special.

For a start, Raflacoat Plus is even more rigid and stronger than before, which means less downtime and faster conversion speeds. It also has more impressive printability, enabling you to produce labels with brighter colours and greater contrast. Raflacoat Plus is suitable for all conventional printing methods.

These qualities allow you to create decorative labels that really catch the eye. In fact, we think Raflacoat Plus will help make your business more successful than ever before. But don't take our word for it. Get in touch with your UPM Raflatac representative and find out for yourself. **Pro Label.**
