

Opaline WSA

Depth of design in premium pearlescent white

Opaline WSA excels in distinguishing premium wines, champagnes, spirits and liqueurs with a luxurious pearlescent sheen.

The icy whiteness of Opaline WSA shimmers as light sweeps across it, giving an impression of depth which adds as much to the print contrast as to the fascination.

This outstanding label face brings even the simplest designs to life and is used to especially good effect with hot foil.

- Shimmering pearlescent label face
- Excellent for premium wine and spirits labelling
- Also effective labelling foods and cosmetics

UPM RAFLATAC TECHNICAL INFORMATION

3/2010 ENG 421

SELF-ADHESIVE ROLLS
FACE OPALINE WSA
Wet-Strength BHZ (sales code)

Product Pearlescent coated wood-free paper, WSA treated for wet strength and alkali resistance.

Use Icy-white paper giving a shimmery effect for luxurious champagne, wine and spirits labels as well as labelling of premium food and cosmetics.

Typical technical values

Substance	90	g/m ²	ISO 536
Caliper	103	µm	ISO 534
Brightness	88	%	ISO 2470/1
Opacity	91	%	ISO 2471

Printability UV Flexography, offset and hot foil. Trials recommended with other printing techniques.

Additional info The high stiffness of this product may result in premature dispensing, especially if the label feed inside the dispensing machine is constricted or if small-diameter bars are used. Rolls should be wound with the face side out. The high stiffness of this paper makes it unsuitable for small-diameter labelling on bottlenecks, for example.
