

The Biofore Company

UPM

PET25 – a thinner polyester liner for film faces Up to 18% less waste and 24% more labels per roll.

At UPM Raflatac we've been innovating new products for changing markets – launching our Thin Range to deliver more added value to the labelling chain.

We're now able to offer a competitive PET25 liner in place of a standard paper liner with film faces. In addition to increased efficiencies in both printing and dispensing, an improved adhesive wet-out provides higher label clarity also for PE-faces. The PET25 liner is available in the following combinations:

- PE Gloss Clear 85 RP 74 PET25
- PE Gloss White 85 RP 37 PET25
- PP Clear TC 25 RP 74 PET25
- PP Clear TC 50 P RP 74 PET25
- PET25 liner also available in our beverage range!

For further information about service and availability, please contact our sales office.

UPM RAFLATAC

UPM RAFLATAC TECHNICAL INFORMATION

09/2009 ENG 615

SELF-ADHESIVE ROLLS
BACKING PET25
FILMIC 8W (sales code)

Product Clear polyester backing material.

Use Specially designed for use with clear filmic face materials in applications requiring excellent clarity. Good strength characteristics for high-speed and difficult applications.

Typical technical values

Substance	35 g/m ²	ISO 536
Caliper	25 µm	ISO 534
Tensile strength MD	210 N/mm ²	DIN 53455
Tensile strength CD	220 N/mm ²	DIN 53455

Warranty Our recommendations are based on our most current knowledge and experience. As our products are used in conditions beyond our control, we cannot assume any liability for damage caused through their use.
