

UPM RAFLATAC

FOOD SAFETY POLICY

UPM Raflatac is one of the world's leading producers of self-adhesive label materials. We supply high-quality paper and film label stock for consumer products, logistics and industrial labeling through a global network of factories, distribution terminals and sales offices. We are committed to quality and continuous improvement in all aspects of our business. We want to be a partner of choice for customers, brand owners and other stakeholders in the labeling value chain and to be known for our world-class service. We are building a smarter future by developing and offering sustainable, innovative and high-quality labeling solutions that help our customers and brand owners increase their brand impact, sales and operational efficiency.

As an integral part of our processes, UPM Raflatac is committed to providing our customers with self-adhesive products designed and manufactured to be used in food labeling applications. This is achieved by meeting the relevant regional regulatory requirements and adhering to established product safety and quality standards. UPM Raflatac strives to mitigate applicable product safety risks and provides transparent product safety communication as required by our customers.

The food safety management system used by UPM Raflatac is based on ISO 22000 standard and integrated into a company-wide, certified ISO 9001/14001 management system. The management systems form the basis of compliance to the regional GMP-requirements related to food safety. Certificate documents are available in our web pages at www.upmraflatac.com/products-and-services/product-safety-and-compliance/management-system-certificates-and-policies.

Key food safety targets are set annually by UPM Raflatac management as part of the business strategy. The continuous development and training of personnel is an important aspect in supporting and achieving the business objectives, food safety targets and consumer safety. The performance of the food safety system is monitored, reviewed, communicated and improved by regional Food Safety Teams.

Antti Jääskeläinen
