

# SERVICE OPTIONS WITH UPM RAFLATAC AMERICAS

UPM Raflatac offers a full spectrum of service options to fulfil all your business requirements. We meet your needs for speed, high volumes, cost control and production efficiency.

Whichever of our service options supports your business best, we offer a unique combination of world-class manufacturing expertise and the industry benchmark in customer service.

## **Coat-to-order**

Coat-to-order products require the full master width to be trimmed and have minimum order length quantities depending upon product.

## **Menu service**

UPM Raflatac's Menu Service gives you immediate access to over 1,500 custom roll-to-roll product combinations, allowing you to add variety and flexibility to your menu.

To create your own unique construction, simply choose from our list of standard face stocks, adhesives and liners and assemble them to fit your specific application or end-use. Each of the available product combinations has been technically proven to deliver exceptional quality and performance by our expert team of product engineers.

## **Small Roll Service**

Produce smaller orders on high-performance label stocks – and service your customers' requirements. Our Small Roll Service\* provides easy access to single rolls with quick delivery. With a small roll, it's a sensibly small start to bigger business.

## **Standard**

With Standard service, the full width of the master must be used. Any offcut not entered as part of the slitting pattern will be charged to the customer and marked as trim waste.

## **Trimless**

A customer may order any width but only at certain length and core sizes. Minimum width per order is 12", minimum roll width is 3".

## **Trimless & Splice-free**

A customer may order any width at a certain length and core size but splice-free. Minimum width per order is 12" and minimum roll width is 3".

For all inquiries, assistance and support, your UPM Raflatac sales contact is ready to help.
